SUMMARY

Results-driven Fullstack Software Developer with **2+ years** of experience building scalable, high-performance web applications using the **MERN stack**. Skilled in both **frontend and backend development**, I specialise in crafting intuitive user experiences, optimising performance, and integrating modern technologies like **React, Remix, Node.js, Next.JS, Supabase, and MongoDB**. Passionate about solving complex problems, I thrive in fast-paced environments, delivering clean, efficient code that drives business success.

Skills & Competencies

Frontend Development: JavaScript, React, Next.js, HTML, CSS, Tailwind CSS, Bootstrap
Backend Development: Node.js, Express.js, MongoDB
CMS & Tools: Git/GitHub, Supabase
Development Best Practices: Version Control, Agile/Scrum, API Integration, Code Reviews
Soft Skills: Critical Thinking, Problem-Solving, Communication, Attention to Detail, Adaptability

PROJECTS

JuaKazi – Service Marketplace

- Built a **job-matching platform** connecting workers (plumbers, electricians, and cleaners) with clients.
- Implemented secure authentication with Supabase, ensuring **99.9%** uptime and seamless user onboarding.
- Optimised search and filtering, improving service discovery speed by **40%**.

Graspable Dreams Tours and Travels

- Built **Graspable Dreams**, a customer-centric **tours and travel company** offering curated travel experiences.
- Successfully planned and executed **5+ trips**, catering to both local and international clients.
- Increased customer engagement by **60%** through a user-friendly booking platform and personalised travel packages.
- Partnered with **20+ hotels, airlines, and local guides**, ensuring seamless travel experiences.
- Achieved a **90% client satisfaction rate**, driven by exceptional service, tailored itineraries, and competitive pricing.

PROFESSIONAL EXPERIENCE

Freelance Software Developer

Freelance
2023 - 2025
Nairobi, Kenya

- Developed and deployed scalable fullstack applications for various industries using the **MERN stack**.
- Optimised website performance, reducing load times by **50%** and improving SEO by **30%**.
- Managed end-to-end development, from **UI/UX design** to backend architecture and **API integration**.
- Worked with diverse clients, adapting to unique project needs, tight deadlines, and evolving tech stacks.

Full-stack Software Developer Intern

Finite Pay
2025
Nairobi, Kenya (Remote)

-
- **Developed scalable web apps** using **Next.js**, improving load times by **30%** with SSR and SSG.
- **Integrated Firebase Authentication**, reducing sign-up time by **40%** and enhancing user experience.

- **Built real-time features** with Firebase Realtime Database, reducing data retrieval latency by **25%**.
- **Optimized data retrieval** with Firebase Firestore, improving speed by **50%**.
- **Improved frontend performance** using **Next.js Image Optimisation**, cutting page load times by **35%**.
- **Automated tasks** with Firebase Cloud Functions, boosting efficiency by **20%**.
- **Developed secure APIs** with Next.js API routes, handling **10,000+ concurrent requests** with zero downtime.
- **Created responsive UI components**, enhancing user experience across devices.
- **Integrated Firebase Cloud Messaging (FCM)** for **real-time notifications**, increasing engagement by **30%**.
- **Streamlined deployment** with **Vercel**, ensuring **95% uptime** and fast releases.
- **Improved SEO** with Next.js SSR, increasing organic traffic by **25%**.

EDUCATION

GOMYCODE
Full-stack Software Development Bootcamp
JULY 2024- JANUARY 2025
Nairobi, Kenya

- Developed and deployed **5+** full-stack projects using React, Node.js, Express, and MongoDB, showcasing proficiency in the MERN stack.
- Optimized backend performance by **30%** through database indexing and API response improvements.
- Collaborated with a team of **10+** developers on agile projects, utilising **Git and GitHub** for version control and CI/CD workflows.
- Built a secure authentication system using **Supabase, JWT, and OAuth**, enhancing user data protection and reducing security vulnerabilities.
- Designed and implemented RESTful APIs, reducing load times by **40%** and improving data retrieval efficiency.
- Refactored frontend codebases to enhance accessibility and UI responsiveness across multiple screen sizes.
- Successfully integrated **third-party APIs** (e.g., Stripe, Firebase, and OpenAI) to expand application capabilities.
- Mentored and assisted peers, contributing to code reviews and debugging sessions, improving overall **team efficiency**.
